

Supported Operating Systems and Relational Database Servers For Niagara Installations

Date: September 5, 2019

Notes Type: PC Operating Systems for Niagara Installations N4 4.1, 4.2, and 4.3

Revision: All

OS Versions

This document serves as a reference of supported operating systems that can run the Niagara software as well as third party relational database servers that can integrate with Niagara. Refer to this document when planning new projects that will require a Web Supervisor station, a Soft JACE station, or an engineering station. **Anything marked with 'Y' means that this was a tested configuration. Items marked with 'N' mean that this configuration was not tested by Tridium, so it is unknown if you will encounter problems.**
