

Satchwell Sigma™

End of Commercialization

As previously announced in [PA-00495](#), we have begun the process of withdrawing the Satchwell Sigma™ portfolio. This announcement provides clarity and more information.

Parts to be Withdrawn

Table 1 below is a full list of part numbers that will be discontinued for sale after 29 December 2017 and enter the Service Period. These parts will have a three-year Service Period. During the Service Period, limited quantities will be available for replacement. These replacement parts are not to be used to support new projects or expansions to existing projects.

From now until 29 December 2017 the parts to be withdrawn will be available for Last Time Buy purposes and will be constrained as follows:

- Order quantity of more than two (2) pieces of any part number will require Category Management approval.
- Availability is dependent on our ability to manufacture the products.

Parts That Will Remain Available

Table 2 lists the parts that will remain available for support of Sigma transitions to EcoStruxure™ Building Operation (formerly known as StruxureWare™ Building Operation). As with the parts that are being discontinued, they are not intended to be used on new projects or expansions. Order quantities of more than two pieces of any part number will require Category Management approval.

These parts are currently scheduled to reach their End of Commercialization in December 2019. The Service Period will be determined at that time.

Table 1: Sigma Parts to be Withdrawn on 29 December 2017

Part Number*	Description	End of Commercialization	End of Service Period*
BAS-NIU	BAS NIU TYPE 2	29 December 2017	30 December 2020
